Admissions Office
Marymount University,

Subject: Request for Test Waiver for MSc in Computer Science Application.

Dear Admissions Committee,

I am writing to formally request a waiver for the standardized test requirement as part of my application for the MSc in Computer Science program at **Marymount University**.

I hold a Bachelor of Science degree in Software Engineering from Wollo University, where I graduated with CGPA of **3.77** out of 4. Throughout my undergraduate studies, I completed all coursework in English, ensuring a strong command of the language both academically and professionally. My education has prepared me to succeed in a rigorous graduate program, as evidenced by my academic achievements and practical experiences.

Additionally, due to my current low-economic background and the challenges posed by the ongoing war situation in my country, it is not feasible for me to take standardized tests at this time. Despite these circumstances, I have consistently demonstrated resilience and commitment to advancing my education and professional development. My final-year project, which involved developing a cross-platform fitness application system, and my internship at App-Factory Academy, where I worked on a weather application, highlight my ability to excel in both academic and real-world settings.

I believe that my academic background, practical experience, and proficiency in English are strong indicators of my readiness for graduate study, making standardized test scores unnecessary for evaluating my candidacy.

I appreciate your understanding and consideration of my request. Please do not hesitate to contact me if additional documentation or further clarification is required.

Sincerely,
Yosef Abawa
